If the goal was not met, what program improvements have been implemented to attempt to meet the goal...

The department has increased the number of national exams purchased in order to allow students to install the software of their own personal devices for additional practice. The department also plans to publish the required software version in the catalog to better prepare students with the right technology to take the exam. Finally, since the department is purchasing a larger number of exams, the students will be given an opportunity to re-take the exam. All of these measures should increase the number of student who earn certification.

The Department voted to have all majors take the Peregrine major field test starting in the fall of 2014. The ETS major field test does not give detailed enough reporting to make curriculum or program changes. However, the Peregrine gives specific data per subject area and per student. The Department can make better use of the results with the Peregrine data.

Over the course of the year, the Department has done four things to address the deficiencies: 1. The Department increased the number of exam installations available so students could put the software on their personal computers for additional practice time. 2. The increased number of exams also allowed the Department to administer re-takes to students with a certain range of passing the first exam. 3. The Department submitted content for the catalog publishing the software requirements for the course so students will have the software compatible for testing. 4. The instructor of the course is investigating Instructor Lab Software for more to enhance the teaching methods in the course.

If the goal was not met, what program improvements have been implemented to attempt to meet the goal...

This was a one-year alumni survey, so many of the students taking the survey did not have the opportunity to earn Microsoft Certification. The department will monitor this number as students graduating over the next couple of years will have felt the impact of the new technology coursework and certification opportunities. Additionally, the following measures were taken to make sure the certification process is improved: Over the course of the year, the Department has done four things to address the deficiencies in the certifications: 1. The Department increased the number of exam installations available so students could put the software on their personal computers for additional practice time. 2. The increased number of exams also allowed the Department to administer re-takes to students with a certain range of passing the first exam. 3. The Department submitted content for the catalog publishing the software requirements for the course so students will have the software compatible for testing. 4. The instructor of the course is investigating Instructor Lab Software for more to enhance the teaching methods in the course.

No

If the goal was not met, what program improvements have been implemented to attempt to meet the goal...

Over the course of this year the Department has implemented four changes as a result of failing to meet the standard. 1. The Department increased the number of exam installations available to the institution in order to allow students to put software on their personal computers for extra practice time. 2. The increased number of exams will allow the Department to administer re-takes to students within a certain range of passing the first time. 3. The Department submitted a statement for the catalog containing the software requirements for the course so students will enter the course with software compatible with the testing software. 4. Instructor Lab Software is being investigated by the professor of the course to increase instructor effectiveness in teaching the material.
